The Center is contacted daily by agencies, researchers, clinicians, and other individuals to answer queries and provide resources, as noted throughout this Annual Report.

Handbook. There are now over 1,500 known users of **Rohner & Khaleque's Handbook for the Study of Parental Acceptance and Rejection**. Instruments by Rohner published therein are used especially often in basic and applied research, but also in clinical practice, court proceedings regarding custody and other issues, foster and adoption placement, and in parenting education programs (often in the context of pre-test and post-test evaluations). The *Handbook* is also one of the most frequently requested texts from the UConn Interlibrary Loan Department. The *Handbook* is translated into Italian and is being translated into Turkish by scholars in those countries.

Rohner's The Warmth Dimension is translated into Greek, Korean, and Persian languages. It is now being translated into Bulgarian.

Dissertations and Theses. Over 260 doctoral dissertations and masters theses in the U.S. and internationally are known to have been completed using research instruments (especially the Parental Acceptance-Rejection Questionnaire, the Personality Assessment Questionnaire, the Physical Punishment Questionnaire, and more recently the Intimate Partner Acceptance-Rejection/Control Questionnaire) created by **Rohner**. Many other theses and dissertations are now in preparation internationally.

Publications. More than 1,000 books, chapters, and articles are known to have been published using research instruments created by **Rohner**. Many others are in preparation, and new ones are regularly discovered. The Rohner Center maintains an online bibliography of writings on interpersonal acceptance-rejection showing more nearly 6,000 entries.

Translations. The PARQ, PAQ, and other measures created by **Rohner** are known to have been translated into 67 languages and dialects. Newer instruments are now being translated for use in intracultural and cross-cultural studies. These include:
